Luna

Moth

These moths are large, with a 4 to 5 inch wingspan. Wings are light green, marked with transparent spots and a pink-purple or yellow forewing margins and hind wings bearing long twisted tails. Antennae are feathery, with antennae of males being more feathery than those of females. Caterpillars are translucent light green with a pale yellow horizontal line along each side and reddish-orange fleshy knobs (tubercles) on each body segment. They grow to be 2 3/4 inches long. I found this moth at my house during Spring Break.
